

GLQ 5+ Lamb

We're on a mission to provide all Gundagai Lamb farmers with priceless information about their flock which allows them to nurture and breed a healthier, more resilient, better tasting lamb.

Set on the Eastern slopes of New South Wales' Riverina region, Gundagai proves the perfect place to bring our vision to life. Its warm and temperate climate creates the perfect conditions for raising lambs, with boundless lush pastures and fresh country air for lambs to roam in freely.

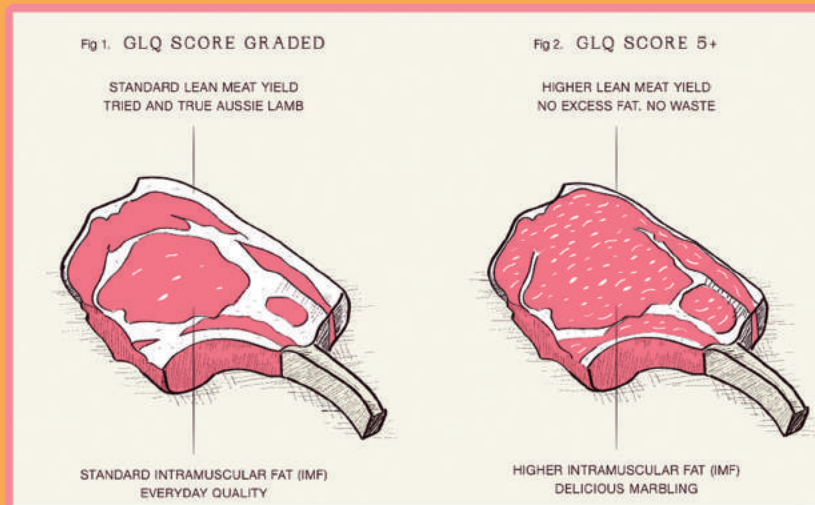

We believe that the best innovations are those that push us forward as a society, and help us achieve a more sustainable future for all living things. A future where lambs are cared for, communities are supported, environmental impacts are reduced and financial resilience is ensured for generations to come.
